

Instruction Book - Casa Isario (ENGLISH)

1. How do I connect to the Wifi network?

There are 2 Wifi-networks available, of which *Casa Isario - Guest* is the network where you as a guest can make use of.

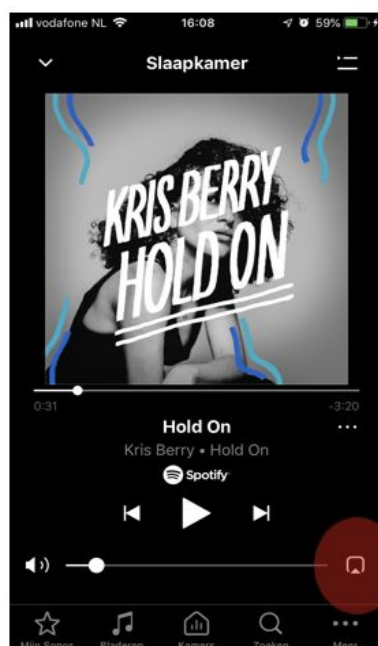

The password is: **Guest_Isario_2019**

In case of difficulties logging in into this network, please contact Ralph by sending a text-message or Whatsapp message: +31 6 1594 0500 (my mobile number).

2. How do I play my own music via the Sonos system?

Before you can play your music from your playlist from sources like Spotify or Apple Music, you first need to have access to the Wifi network. To get access to Wifi, please see under 1.

Once you are Wifi-connected, make sure you have installed the **Sonos App**. When you do not yet have this, please download this in the Apple Store (users of iPhone's) or the Google Play store (users of Android devices). Once you have downloaded the Sonos App (and completed your details), please open the Sonos App and select one of your playlists, favourite radio channels or other sources where you have your music. When you are finished selecting the music you want to play, make sure you do NOT play this on your mobile device or tablet device, but check-mark the icon displayed in the picture below:

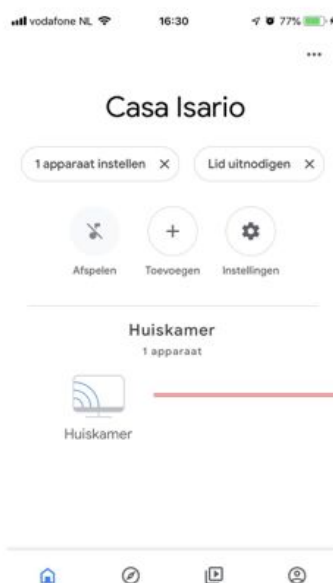

Search for this icon, then select the room where you want to play music in the next screen.

When you have selected the room where to play the music and press the play button, the music should start.

3. How can I view my own TV-content on the television?

Please switch on the television (with the Samsung remote control, and in addition the Skybox remote control). Also make sure that you select the "Source-button", and move it to **HDMI**. Before you can stream your tv-content from your mobile device or tablet (to the television), you first need to have access to the Wifi network. To get access to Wifi, please see under 1.

Once you are Wifi-connected, make sure you have installed the **Google Home App**. When you do not yet have this, please download this in the Apple Store (users of iPhone's) or the Google Play store (users of Android devices). Once you have downloaded the Google Home App, please open that app and make sure you are connected to the Guest_Isario_2019 network. You should see this:

Make sure you are connected to "Huiskamer" and can see this on your mobile or tablet device.

The next step is that you go to the app on your own mobile device or tablet, that contains TV-content. Select a TV-program and make sure you check-mark the icon displayed in the picture below:

Make sure to press on this icon, this enables you to stream to the television.

When you select Play, you should be able to see the TV-content on the television, and your mobile device or tablet now functions as remote control.
